

# PAD PRAIRIE INITIATIVE

## Leg pain screening event

**Saturday, Nov. 14, 2015**

10 a.m.- 5 p.m.

### **WestRidge Mall**

2001 W. Lincoln Ave., Fergus Falls

UNIVERSITY OF MINNESOTA

School of Nursing

**Lake Region**  
HEALTHCARE

Do you experience leg pain when you walk? You may have peripheral artery disease (PAD), which is a condition that occurs when blood flow to the legs is blocked from buildup of plaque or fatty deposits in the blood vessels of the leg. An estimated 8 million Americans are currently living with PAD, but only 2 million have been diagnosed.

Find out your risk for the disease at our free screening event.

**Who should come:** Adults experiencing leg pain having any of the following risk factors

- History of smoking or current smoker
- Diabetes
- High blood pressure
- High cholesterol
- 50 years of age or older

**For more information and to register**
